📍 Y N Hosakote, Karnataka - 572141

SUMMARY

I'm a web application developer who loves creating innovative, user-friendly, and responsive web apps. With experience in front-end technologies like JavaScript, React.js, and TypeScript, I enjoy exploring new tools, Libraries and frameworks. I'm skilled at solving problems, building scalable and efficient solutions, and delivering great web experiences. Strong debugging, troubleshooting, and communication skills, along with an analytical mindset, help me understand user needs, provide accurate estimates, and deliver projects on time. I'm excited to bring my skills and passion to new challenges and projects.

EXPERIENCE

Senior Product Engineer

Tata Consultancy Services

📅 03/2022 - Present 📍 Bangalore, Karnataka

Project: ADK Designer

Objective: ADK Designer is a no code low code platform which is designed to help financial services for user to create their own application, where we develop widgets for banking solutions which is having multiple configurations and many features, user just need to drag and drop widgets to create their own application.

Technologies Used: Javascript, React.js, Node.js, TypeScript, Redux, etc.

Role: Developer

Responsibilities:

- Created a dynamic UI with reusable components to streamline future feature additions.
- Integrated Redux for efficient state management across the application.
- Contributed to product enhancements by developing and implementing various features, improving overall functionality and user experience.
- Resolved bugs to ensure a defect-free product, enhancing stability and improving overall user experience.

Project: BNI (Bank Negara Indonesia)

Objective: To deliver a seamless and user-friendly interface for the client by developing a robust front-end using the ADK Designer tool and ensuring product quality through effective defect resolution, contributing to enhanced user satisfaction and project success.

Technologies Used: Javascript, React.js, Node.js, TypeScript, Redux, etc.

Role: Front-end Developer

Responsibilities:

- Handled responsibilities of payments and services banking functionalities
- Addressed and resolved defects to ensure the application operates smoothly and remains free of issues, enhancing its reliability and user satisfaction.
- Got an **Applause Award** for handling priority issues and contributed defect fixes, change request and build deployment activities in expected time frame.

Project: Deck of Cards

Objective: Developed and maintained an internal web application using ADK Designer Tools, streamlining processes and improving organizational efficiency.

Technologies Used: Javascript, React.js, TypeScript, Redux, Material UI, etc.

Role: Senior Product Engineer

Responsibilities:

- Managed responsibilities across Accounts, Cards, Transfers, Services, and various other banking functionalities, ensuring seamless operation and user satisfaction.
- Addressed and resolved defects to ensure the application operates smoothly and remains free of issues, enhancing its reliability and user satisfaction.
- Received the **Best Team Award** and **Star of the Month Award** for effectively handling priority tasks, resolving critical defects, and ensuring timely delivery of change requests, contributing to successful client demo readiness.

STRENGTHS

Problem Solver

Developed numerous reusable components, leading to a noticeable reduction in development time.

Collaborative Team Player

Successfully collaborated with cross-functional teams to deliver projects on time and within budget.

Strong Analytical Skills

Utilized strong analytical skills to optimize application performance by implementing React techniques, improving response times significantly.

SKILLS

- **Web Technologies:** HTML5, CSS3, JavaScript, React.js, Redux, ES6, TypeScript, Node.js, Express.js
- **UI Libraries:** Chakra UI, Material UI, Antd, Bootstrap
- **Tools:** VS Code, Postman, Android Studio, GitLab, GitHub
- **Database:** MS SQL, Mango DB
- **Operating System:** Windows, Mac OS
- **Methodologies:** Agile Methodology
- **Other:** Manual testing

PROJECTS

Basic Employee List and Details app

Developed a basic Employee List and Details app, allowing users to view a list of employees and access detailed information for each.

MERN Chat App

Developed a full-stack MERN Chat App with real-time communication via Socket.io and encrypted user data stored in MongoDB.

Simple Dating App

Developed a simple dating app using MERN stack, allowing users to swipe left or right on potential matches. Integrated real-time swiping functionality and user interface interactions to enhance the user experience.

Technologies Used:

Javascript, React.js, TypeScript, Redux, Material UI, etc.

EDUCATION

BE in Mechanical Engineering

Bangalore University

📅 2016 - 2020
